SUMMARY

A Full-Stack Web Developer skilled in the latest technologies, with a passion for the customer experience. Proficient in responsive web design, a wide range of front-end frameworks such as Bootstrap, AngularJS and ReactJS, and has back-end knowledge regarding SQL databases and MongoDB.

SKILLS

HTML/CSS: Responsive Web Design, Bootstrap, Phaser
JAVASCRIPT: NodeJS, AngularJS, ReactJS
SQL: Sequelize, PostgreSQL
MONGODB: mongoose ORM
RUBY: Ruby on Rails

PROJECTS

CHEWBACCA'S ADVENTURE   Oct 2016 to Oct 2016
A game made with NodeJS and ExpressJS. User's info and stats get stored in a SQL database using Sequelize. You play as Chewbacca, trying to convince characters to give you money, so you can buy starships capable of getting from one planet to the next.

SKETCHY SECTION   Dec 2016
A site that gets data from the Socrata API, and utilizes the Google Maps API to display car collision hot spots in the Seattle area where there is no traffic light.

JT-WORLDWIDE   Nov 2016 to Dec 2016
This website uses Ruby on Rails and MongoDB. Users can post links to anything from interesting articles to projects of their own. Others can then comment and vote on these posts.

SPACE MARIO   Sep 2016 to Sep 2016
A platformer game utilizing Phaser, an HTML5 framework written in JavaScript.

ACTIVITIES

SOCRATA HACKATHON   Dec 2016
Led a team who won a hackathon that was hosted by Socrata and held at General Assembly. Teams were comprised of Web Developers, Data Scientists, and UX Designers. We got car crash data from Socrata's API and displayed it using the Google Maps API. We hope it will bring attention to potentially dangerous intersections, that could be made safer with a traffic light.

EDUCATION

General Assembly
Web Development Immersive 2016

California Polytechnic University - Pomona
Geological/Earth Sciences 2014-2016

EMPLOYMENT

BLUORBIT INC   Seattle, WA
Web Developer Intern   Jan 2017 to Current
I work with designers to finalize site maps and wireframes, then developing them into fully functional web applications. Technologies used include Javascript, React, and Node.

ELDER'S PAINTING
Construction Manager   Jun 2014 to Sep 2016
-Start to end commercial and residential restoration work.
-Communicate effectively with co-workers and clients.
-Get necessary materials to the jobsite.
